

HRIS Manila Council

System & Process Flow Documentation

Complete Modules · Feature Summary · End-to-End Process Flows · Workflow Diagrams · Roles & Responsibilities

Requested under	CR Request ID 016 — "HRIS Process flow for all modules and features for documentation"
Requested by	Chief of Staff Gino Boongaling
System	HRIS Manila Council (manilacitycouncil.com)
Report date	22 July 2026

Executive Summary

Documents the system as it exists today — modules, features, end-to-end flows, and how modules depend on each other.

- **15 functional modules** across Core Records, Self-Service, Workflow & Approvals, Configuration, and Reporting
- **6-role authorization model:** ADMIN, HR, EMPLOYEE, SUPERVISOR, COUNCIL, VICEMAYOR
- **Multi-stage Leave decision workflow** spanning Employee, HR, Supervisor, Council Secretary and Vice-Mayor accounts
- Built continuously through Change Requests `CR-015 → CR-023`, not a single rewrite

This is a documentation exercise — no application code was changed to produce it.

HRIS Overview

Who uses it

- HRM Section (HR/Admin) — full 201-file, leave, clearance management
- All Council employees — self-service PDS, leave, clearance
- Supervisors, Council Secretary, Vice-Mayor — leave decision stages

Stack & scale

- Java 11 · Spring Boot 2.2.4 · MySQL hris_01
- nginx + Let's Encrypt, systemd-managed
- **625** active employee records verified 22-Jul-2026

User Roles & Responsibilities

Role	Responsibilities	Landing page
ROLE_ADMIN	Full system administration	Dashboard
ROLE_HR	Records mgmt, leave screening, acting-official fallback on every stage	Dashboard
ROLE_EMPLOYEE	Self-service: own PDS, leave, clearance	Dashboard
ROLE_SUPERVISOR	Endorse / deny / return-to-HR leaves at FOR_ENDORSEMENT	Leave Approvals
ROLE_COUNCIL	Council Review; finalizes <15-day leaves herself	Leave Approvals
ROLE_VICEMAYOR	Final approval/denial/return for leaves ≥15 days	Leave Approvals

Complete HRIS Modules

Core Records

- Employee Records
- Personal Data Sheet
- Appointments
- Service Record
- 201 Files
- Archive

Workflow & Approvals

- Leave Management
- Clearance
- Training & Seminar

Self-Service, Config & Reporting

- Notifications · Dashboard/Nav
- Auth, Roles & Password
- System Settings (~22 screens)
- Reports & PDF Exports
- Year-End Processing

Feature Summary — Core Records

- **Employee Records:** the 201-file master, credentials/role provisioning
- **PDS:** 10 sub-sections, employee self-edit with server-side ownership checks, "N/A" print for blanks
- **Appointments / Service Record:** HR-maintained history + document attachments
- **201 Files:** general document repository by Document Type
- **Archive (CR-023):** SALN / Resigned / Leaves folders, now **admin-manageable** — add/rename/delete via Manage Folders, delete blocked while files exist

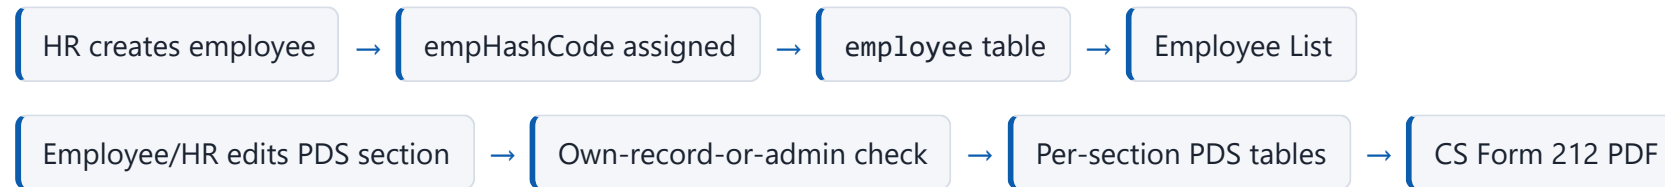

Feature Summary — Workflow & Approvals

- **Leave Management:** CS Form 6 filing → multi-actor decision flow → Leave Card posting; appeal/cancel; monthly accrual; Leave Tracker calendar; CS Form 6 / Leave Card / Verification Receipt PDFs
- **Clearance:** employee files, each configured approver signs off, approved/disapproved PDF
- **Training & Seminar:** per-employee training records with certificate upload, feeds PDS Learning & Development

Feature Summary — Self-Service, Config & Reporting

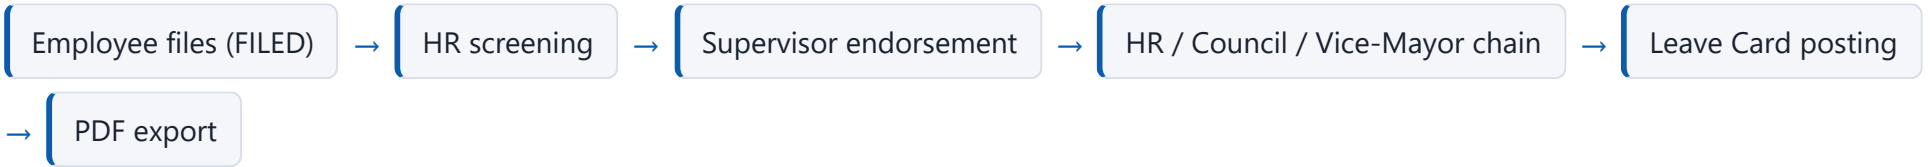

- **Notifications:** session-scoped bell, unread badge
- **Dashboard/Nav:** role-based landing pages, quick-nav badges
- **Auth & Roles:** BCrypt (legacy auto-migrate), 6 roles, self-service password change
- **System Settings:** ~22 lookup CRUD screens (Departments, Salary Grades, Leave Types, Holidays, ...)
- **Reports:** Jasper PDFs across every module
- **Year-End Processing:** mandatory-leave deduction, scheduled + on-demand

End-to-End Flow — Employee Records & PDS

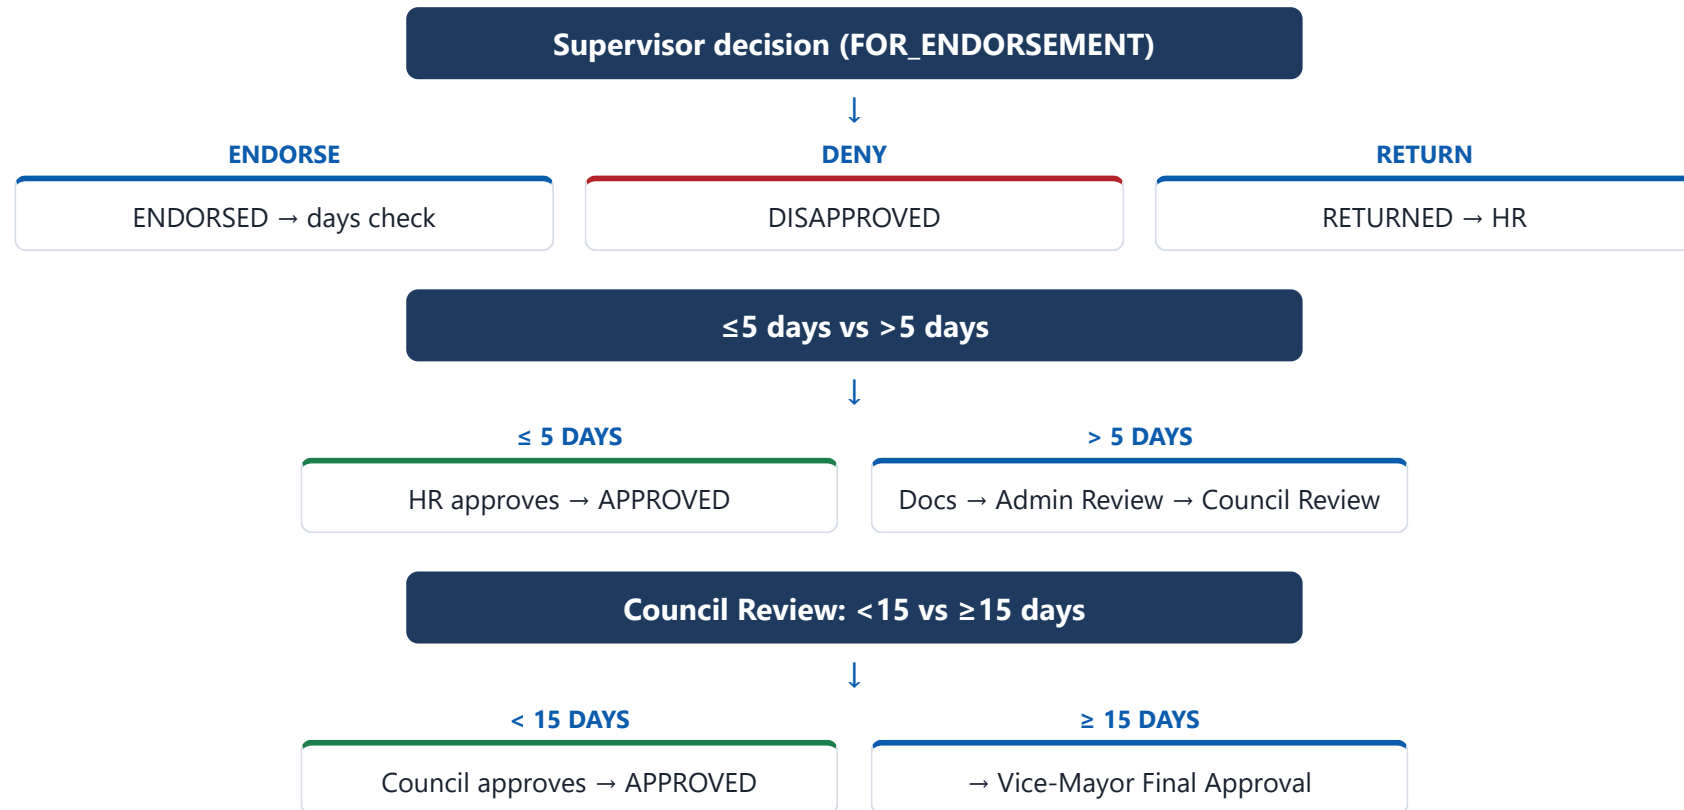

User → System → Database → Output for every module is detailed in the full report, Section 5.

End-to-End Flow — Leave Management

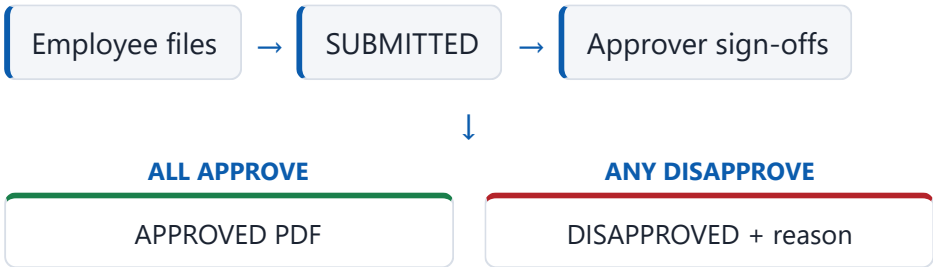

User	System	Database	Output
Employee / HR / Supervisor / Council / Vice-Mayor	LeaveWorkflowController — per-stage, per-role gate	leave_application, leave_workflow_action, leave_card_entry	Leave Card balance; Form 6 / Receipt / Card PDFs

Detailed Workflow Diagram — Leave Decision Flow

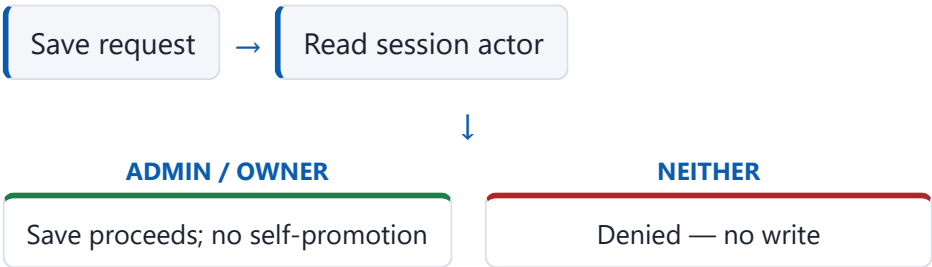

Detailed Workflow Diagrams — Clearance & PDS Gate

Clearance approval

PDS edit-authorization gate

Module Interactions & Dependencies

No module is fully isolated — the Employee Record is the hub every other module reads from; System Settings underpins nearly all of them; Reports is downstream of everything.

Reports & PDF Exports

Report	Source module
PDS (CS Form 212)	Personal Data Sheet
CS Form 6	Leave Management
Leave Card	Leave Management (ledger)
Leave Verification Receipt	Leave Management (>5-day leaves)
Clearance	Clearance
Service Record	Service Record
Position Description Form	System Settings — Position Titles
Report on Separation, Employee Reports	Employee Records

System Settings Reference

~22 lookup/reference-data CRUD screens, all Admin-only.

- Departments · Divisions · Offices · Districts
- Position Titles (+ Position Description Forms)
- Salary Grades · Levels
- Employee Status · Appointment Status · Civil Status
- Degree Courses/Levels · Academic Honors · Schools · Scholarships · Professions · Eligibilities
- Document Types · Learning Types
- Leave Types · Holidays · Leave Signatories

Employee Status drives the year-end coterminous exclusion; Leave Signatories hold the default names printed on CS Form 6.

Notes, Assumptions & References

- Current as of **22 July 2026**, including CR-023 (Archive sub-folders) shipped the same day
- Sources: `docs/HRIS_PROCESS_FLOWS.md`, `docs/leave/LEAVE_PROCESS_FLOW.md`, `docs/changes/*.md`, application source, live database
- Security/vulnerability analysis is out of scope here — see the separate `HRIS_Old_vs_New_Comparison_Report` (13 Jul 2026)
- No code was changed to produce this documentation

Closing

This deck and the accompanying full report cover every HRIS module, its features, its end-to-end process flow, and how modules depend on one another — the complete answer to CR Request ID 016.

Full detail, source citations, and additional diagrams are in `HRIS_System_Documentation_Report.pdf`.
